

Product Name :

2 Stroke, 4 Cylinders Detroit Diesel Engine - Electrical

Product Code :

TechnicalLab0480

Description :

2 Stroke, 4 Cylinders Detroit Diesel Engine - Electrical

This product is a cut-away of an industrial engine produced by the U.S. located Detroit Diesel Corporation. This is a 2-stroke, 4-cylinder engine widely used in industrial and nautical fields and allows you to:

- Use its electrically controlled reduced speed to teach about all of the moving mechanical parts.
- Point to each of its carefully sectioned parts to train your students.
- Easily differentiate between the color-coded cross-sections, cooling system, lubricating circuits, vibration-dampening balancing shafts, etc.
- Expect a longer life for the cut-away because of the many chromium plated and galvanized parts.

SPECIFICATIONS:

- Air intake channels
- Lobe-type volumetric compressor
- Exhaust valves (2 or 4 per cylinder) controlled by camshaft in the monobloc
- Direct injection by means of a pump/injector for each cylinder

- Vibration-damping balancing shafts
- Water cooling with centrifugal pump
- Lubrication circuit with geared oil pump
