Description :

Diesel Engine Sectioned for Automotive Lab, Automotive Testing Tab and Automobile Engineering Training Labs

Technical Specification :

Diesel Engine Sectioned Complete Set - These sectioned engines with transmissions are proven to be one of the most useful demonstration aids used in an automotive classroom. The complete engine and transmission has been carefully sectioned to expose all of the internal operational details. All major parts have been sectioned including the engine block, transmission, alternator, distributor, carburetor, starter motor, water pump, thermostat, oil filter, fuel pump, etc. This trainer provides the instructor with a complete 4-cylinder diesel engine for group or whole-class demonstration, mounted on a moveable, heavy-duty steel frame. The engine is operated by hand and is sectioned so that all moving parts can be seen and the way they interact can be observed. This resource is supplied with a manual containing practical tasks and activities.
