

Product Name :
Elevator Control PLC Application Modules for Instrumentation Electric
Labs

Product Code :
ITT-TR-20

Description :

Elevator Control PLC Application Modules - Elevator Control PLC Application Modules - Elevator Control by PLC enables students and practicing engineers to gain invaluable practical experience of the principles and application of programmable logic controllers. The object is to connect and program an external programmable logic controller to monitor and control elevator system. Elevator controlling model is shown with the help of switches & LEDs. The apparatus is connected with input and output of PLC. Three floors as shown on board, switches are used to call and go to the desired floor. LEDs are indicating on which floor the elevator is present. The elevator model board is made in such a way that student can understand how elevator can be control by using PLC and also student gets familiar with how inputs and outputs of PLC are used.

User friendly and powerful instruction sets.

Ready to use application board.

Exhaustive learning material
