

Product Name :
Motorised Governor Apparatus

Product Code :
Technical0015

Description :

The unit consists of a main spindle driven by a variable speed motor. Three different governor assemblies can be mounted over the spindle. A with pointer measures the lift of the governor.

Students can calculate characteristics of governor at and compare their performance viz. Sensitiveness, stability, governor effort etc.

Specifications:

Governor assemblies - Hartnell, porter & propel governor assembly one each with rotating weights.

Variable speed FHP D.C. motor to drive the main spindle,

Sliding weights for porter & proell governor.

Scale & a pointer to measure governor lift.

Spring & Spring compression adjustment arrangement.

A technical manual accompanies the unit. Services required: 230V, 5A, AC supply connection.

Bench area of 0.75 x 1m. at working height.
