

Product Name :
Power and Differential Amplifier Trainer for Electronics Teaching Labs

Product Code :
BEL-TR-20

Description :

Power and Differential Amplifier Trainer - Power and Differential Amplifier is a basic product comprising of numerous transistorized amplifiers like Class A, Class B, Class C and Differential amplifier. This product is equipped with an in-built DC Power Supply and Sine wave generator which make it a complete unit for performing all experiments without requiring any extra accessory. Study of Class AB amplifier can also be done using this kit. Power amplifier, as the name depicts, amplifies the input signal and makes it stronger at the output. Power amplifier can be used as audio amplifier, RF amplifier etc. Differential amplifier amplifies the difference between the two signals

In-built DC Power Supply

In-built Sinewave Generator

Easy Illustration of different types of amplifier

Learning material CD
