

Product Name :
Three Phase Lab for Electrical Lab

Product Code :
ADM-030-NE

Description :

Three Phase Lab for Electrical Lab for Electric Motors Teaching Labs - The Three Phase Lab with Three Phase Low Voltage Power Supply is an elite training system for the electrical laboratories. There is a three phase low voltage supply that provides 18 V of low voltage which is highly safe. This system is valuable in understanding the basic concepts of Three phase circuits like star-delta connections, their phase and line voltages, currents etc. Being different from the present scenario, this system is designed in such a way that a student can himself make connections of three phase circuits because all the experiments are performed on low voltage. The product is designed with keeping in mind that R, L, C combination can be connected in series as well as in parallel in Three Phase circuits.

Designed considering all the safety standards

Hands on Practice

Stand alone operation

Test points are provided to measure line and phase parameters

Low cost training system

2 Years Warranty

Provided with a detailed Operating manual

Experiments that can be performed

Study of Three phase low voltage power supply

Study of Three phase star connection

Study of Three phase delta connection

Study of Three phase circuits with balanced load

Study of Three phase circuits with unbalanced load

Three phase power measurement
